Refuelling events

Important information

Report content

- Only the metrics and events actually available are shown.
- No score, no points rating and no artificially calculated additional metrics.
- The key metrics above have been reduced to the relevant core values.

Event log

Chronological overview of the events actually transmitted in the selected period.

Time	ID	Category	Event	Value
28.03.2026 14:08:11	1	Engine	Cold engine revved high Shortly after the start of the trip, the engine was revved significantly while still at low temperature.	5.860 rpm / 46 °C
28.03.2026 14:16:34	2	Engine	High engine load Engine load was in the very high range over a noticeable period of time.	94 %
28.03.2026 14:27:52	3	Speed	Elevated speed Speed was above the usual range for regular road operation.	214 km/h
28.03.2026 14:31:06	4	Drivetrain	Strong kickdown Very abrupt load change with strong power demand detected.	96 % pedal / 91 % load
28.03.2026 14:39:48	5	Speed	Very high speed Vehicle was moved into a significantly elevated speed range.	247 km/h
28.03.2026 14:40:13	6	Engine	High engine speed Engine was operated in the upper rev range.	6.410 rpm
28.03.2026 14:41:02	7	Brakes	Heavy deceleration Powerful braking from a high speed range detected.	-8,7 m/s ²
28.03.2026 14:52:20	8	Engine	Renewed full-load phase Renewed high power demand with sustained high engine load detected.	92 % load / 6.180 rpm
